GERARD® ALPINE

New GERARD® Alpine has been designed in New Zealand to replicate the natural weathered look of traditional European slate roofs.

GERARD® Alpine is made from aluminium-zinc coated steel. The barrier protection of aluminium and the sacrificial protection of zinc are combined to provide protection for the steel substrate. The acrylic basecoat, granules and acrylic overglaze applied provide protection to this alloy coating further enhancing its durability.

TECHNICAL

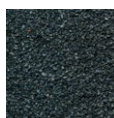

Overall Length:	1335 mm
Length of Cover:	1250 mm
Width of Cover:	368 mm
Roof Cover:	0.46 m ²
Slates per m ² :	2.18
Weight/panel:	2.9 kg
Weight/area:	6.6 kg/m ²
Minimum pitch:	15° (27%)
